

PLEASE HELP STOP MY PERSECUTION

I am a Pakistani citizen living lawfully in UK on HSMP work visa. I was student in USA where I studied electrical engineering at Northwestern University and mathematical finance at New York University. I was very ambitious, worked very hard and really wanted to excel in life. But my crime was that I wanted to serve my country, Pakistan, and was always super-excited about serving my country and wanted it to be the most prosperous country in the world.

One of my anti-Muslim professors at New York University told CIA about me and CIA circles did not like my zeal about my country and they were desperate to stop me. Since I was a very law-abiding citizen, they could never have done anything against me openly and according to law. So they started using neuro-electromagnetic weapons against me. They gave me drugs in my food to alter my brain. I am a victim of neuro-electromagnetic weapons for a very long time now.

Despite being on Voice to Skull, I continued to work and tried to excel. It is a story of human determination and hard work. I am known in mathematical finance community for my research. My SSRN author page is <http://ssrn.com/author=435366> where you can look at some of my research papers. Some of my research papers are not in public domain.

After several long years of persecution in different countries, I came to UK to set up my financial software firm in London. But in UK, I am again being targeted by neuro-electromagnetic weapons and major problem is that UK secret services are actively cooperating with CIA in my persecution. This is a very serious human rights issue. UK secret Services use special chemicals that go into food of everybody but are totally inert and harmless to people unless ionized by electromagnetic waves. The body of victims of neuro-electromagnetic weapons is kept charged by electromagnetic waves and these chemicals are used to alter the victim's brain. Again these chemicals are mixed in food of everybody to target some specific individuals. This may be hard for gullible people to believe but this is sheer science. Especially the stores on Cromwell Street, Earl's Court, Gloucester Street, North End road and West Kensington in London are hugely involved in this activity though other stores are also a part of it to a lesser extent. If you investigate in those areas, you will know the truth for sure.

Neuro-electromagnetic weapons are weapons used to control, alter or damage the brains using electromagnetic waves, microwaves or ULF waves. The target is given food with chemicals that go into his brain. Some chemicals go and alter the brain systematically and some other ionize the brain. Different neurons in the brain are mapped for their functions using fast computers. Then the same neurons are stimulated to do the specific job by sending magnetic signals to the brain through electromagnetic waves and start controlling or altering the brain of the victim. American CIA does it very frequently because they have the best technology to deal with it and nobody sees electromagnetic waves passing through air so they always get away with it.

In addition to persecution by neuro-electromagnetic weapons, devices are fitted on my computer that transmit data and alter my programs actively to hinder my research and development work. I disabled Bluetooth and wifi on motherboard of my laptop but still was able to see network activity and suspicious programs running on my computer. I saw one of these programs was named as "cryptographic server". Later I noticed that there were more than six hidden users on my laptop that had access to different files on my computer while I did not have access to those files and was unable to delete DLLs and drivers that transmit data to other devices. I bought that laptop only a

week ago and nobody else had used it in my presence. I can give more details about it if you would want to know? I was facing persecution for a long time but not being able to run my programs gave me serious problems as that is what I do to earn money.

Sometimes in my apartment, I would put on aluminium shield to protect myself from neuro-electromagnetic weapons. I would be asked by Voice to skull to take off the shield. I would refuse but then they would use directed energy on my head and I would shout with sheer unbearable pain and I would have to take off the shield. It is hard to describe the intensity of pain in words.

Again I have never committed a crime and in my wildest dreams, do not want to commit any crime or harm to anyone. Why does the law not get me ? Simply because I am a very good human being. My only crime is that I love my country Pakistan and want it to be the best country in the world and CIA circles want to subjugate our countries forever. CIA people think they are gods and and they can play with anyone so raise your voice against them, please.

Since you are an ardent supporter of human rights, I thought I should ask you for help. As Quran says, " saving one innocent life is saving all humanity" I would request you to take some action to protect me. I am innocent and am being persecuted by CIA only because I could excel to any limit and would serve my country which many people in CIA circles do not like.

I am filing an application with the Investigatory Powers Tribunal in the UK that reviews applications of wrongdoing by UK Secret Services. I would request you to come forward and investigate this incident of human rights violations by so called champions of human rights.

PERSECUTION IN AMERICA WHERE IT STARTED:

At the start of 1998, when I was a student at New York University, my persecution with neuro-electromagnetic weapons started. When I became the target, my mind was changed drastically. I would lose the meanings of words. I would sit in the library for several hours without grasping a single idea. I was stimulated to do things other than my studies. But I continued to work hard and started to do my financial research again. But CIA started to manipulate me more and more and some of my professors started to discourage and create problems for my research. I was again given drugs in my food several times to stop me from working and be able to use neuro- electromagnetic weapons on me and alter my brain and my research work was disrupted again. Several times I would become very sick after having food but I had no idea what was happening to me and who was doing it. I contacted officials of my university but they all refused to help me. I want you to understand that it was a very painful time and I have just written very briefly about it.

PERSECUTION IN PAKISTAN

When times became really tough and I realized that I was facing government persecution and CIA was manipulating me and altering my brain, I decided to leave America and go to Pakistan. I thought that they would leave me when I would get into Pakistan but CIA Bosses are emboldened in third world countries. When I reached Pakistan, I suffered from the same cruelty of CIA dictating other third world nations what to do by generously bribing top officials. About ten people came to my home and gave me several injections and tied my hands and legs. I lost consciousness for one night. I did not know what was happening and could not even open my eyes. I had extremely severe shivering for two days and did not know what was happening. I was kept in house arrest with four

soldiers of Pakistan Army, on CIA's orders, stopping me from leaving the house and I was locked in my room every night. This continued for six months. After six months, I got drug induced jaundice because of over-drugging. I could not sleep for more than two months because of severe itching of jaundice. I had blood marks all over my body because I could not resist itching.

I went through extreme torture over the years. They altered my brain again and again using mind altering drugs. I could not work for several years but came back with sheer determination to succeed. It was more difficult than can be described.

I am giving some examples of torture I went through. These are just physical symptoms of torture. However true damage to brain cannot be described easily in terms of any physical problems we suffer. It is far deeper than others are ready to believe. People get retarded when CIA uses neuro-electromagnetic weapons and damage to intelligence and brain's capabilities cannot be measured by any physical standard and that is one reason that they use it and get away with it.

Voice to Skull

I am on Voice to Skull torture for more than six years now.

Sleep deprivation

I would be kept awake for several weeks in a row using neuro-electromagnetic weapons. Once this torture lasted more than a month.

pain in bones and skull

They charge the skull, ears, cheekbones and all areas surrounding the brain using EM waves. Sometimes my skull would be so charged that I would have intense and sheer pain in my forehead, skull, cheekbones and ears. I could not resist but shout from intense pain. I would prefer death to such torture.

one-sidedness

After the torture started, I started to face the following one-sidedness problems due to mind control. This was never the case before the episode of mind control torture.

1. When I walk my one step is considerably larger than the other.
2. I see differently from both eyes. One eye has decent enough brilliance while the other sees only hazy images of the world around. I see things meaninglessly without registering any effect on my brain and without keeping anything I see in my memory.
3. When I raise my hands, one of my hands has a different feeling while the other hand is lifeless and has a different feeling. Sometimes when I talk half of my tongue resonates differently and the other half of my tongue resonates differently and One side of my head is always totally numb and feelingless.

Blurred vision

They released several chemicals in my brain and it is unbelievable how colours in my eyes change. Sometimes there will be real but artificial brightness in colours and at other times there will be total dullness. Sometimes, it would be just blurred vision. At times I would have far-sightedness or near-sightedness. I see at least four different shades of same red or yellow colour at different times while seeing the same thing. Just changing perception of reality all the time. Many times, my vision is blurred for several weeks and I could just see vague images of things.

Forced sexual arousal

There were times when I was forcefully sexually aroused. This is the greatest insult to any human being. I would have forced erection. I do not want to write much about it. But it is total human disgrace and was a quite frequent thing. Nazis wanted full control over me.

Tongue control

An example of extent of body control using neuro-electromagnetic weapons is something that occurred last year. My tongue totally came out of my mouth and was held there for fifty minutes. My nostrils would tend to close and I would have serious difficulty breathing. It is ultimate insult for anyone to have been forced into a situation with total disgrace before others.

I was innocent and I had no remote connection to any anti-American activity. I was tortured, I was humiliated, I was retarded and I was failed because I was a Muslim who wanted to succeed in life and serve his country. It was unacceptable to CIA Nazis who knew I was proud of my being a Muslim and avowed total allegiance to my country, Pakistan.

I came to FT office over the weekend and was told by the reception that they cannot give me any office phone number of any editor or their email and it is against their policy. I was totally surprised so I would request you to check what is going on?

EDUCATION:

New York University, New York, NY, USA.

Masters of Arts in Economics with a concentration in Mathematical Finance, September 2002.

Northwestern University, Evanston, IL, USA.

Bachelor of Science in Electrical Engineering, March 97

RELEVANT EXPERIENCE:

Quantitative Research Analyst, UP-FRONT Inc., Japan.

And various roles Feb 03 - Present

Developed a stochastic volatility displaced diffusion LIBOR Market Model in which stochastic volatility has a form of Heston model as proposed by Andersen and Andreasen in their article Volatile Volatilities. Global Calibration to more than 2000 swaptions upto sixty year is super stable and takes less than a minute on an ordinary laptop. Priced callable reverse floaters, callable CMS spread swaps, Callable CMS range accruals and more exotic deals as well as their deltas and vegas in this stochastic volatility model.

Worked with simulation and global calibration of Heston's model in classical as well as Andersen and Andreasen form for equities and FX structured derivatives like PRDCs.

Worked on a complete suite of LIBOR market model including pricing of highly exotic structured derivatives, calibration of model to the whole of the swaption matrix and hedging of the market risk.

Worked extensively with pricing of most complex callable LIBOR exotics. The instruments include Bermudan swaptions, Bermudan callable reverse floaters, Bermudan call options, Bermudan CMS floaters, Bermudan CMS reverse floaters, Bermudan CMS spread options, CMS TARN structures, Bermudan Snowballs, snowblades, and Bermudan callable PRDC. Extended Longstaff and Schwartz method to deal with

complex callable fixed income structured derivatives. Also calculated greeks for some of the above mentioned structured derivatives.

Worked with the derivatives consulting company on the pricing of Bermudan Callable and Trigger Power Reverse Dual Currency Note and other FX/IR hybrid derivatives. Developed a multi-factor cross-currency LIBOR Market Model for the pricing of these instruments. Implemented the advanced analytics of the model on Excel using VBA and C++.

Developed a CMS and equity Hybrid Multi-factor CEV LIBOR Market Model. Here the coupon is a CMS spread type when Nikkei is below certain reference or a Nikkei coupon otherwise.

worked on a three factor Hull White Cross Currency model in Cheyette framework for fast pricing of Bermudan trigger PRDCs. This involved analytic calibration of the model to FX volatilities and to swaption volatilities of local and foreign economy. This is different from traditional Hull White framework in the sense that all work was done in Cheyette framework which can easily be generalized to square root or lognormal volatilities for LIBOR rates as in HJM.

worked on calculation of delta hedges for European or Bermudan Interest rate derivatives in LIBOR market model. The calculation of bucket hedges is done in the same single simulation in which price of the LIBOR derivative is calculated and no separate simulations are needed to calculate hedges. This results in very fast calculation of hedge ratios in terms of hedge instruments.

WORKING RESEARCH PAPERS:

1. MULTI-FACTOR CROSS CURRENCY LIBOR MARKET MODELS: IMPLEMENTATION, CALIBRATION AND EXAMPLES.

2. CALIBRATING MULTI-FACTOR MARKET MODELS: A NEW APPROACH

3. CALCULATING DELTA GREEKS OF CALLABLE EXOTICS IN THE LMM: A NEW APPROACH
